Education

Christ (Deemed to be University), Bangalore — **June 2024 – Present**
Masters of Computer Application — *Bangalore, Karnataka*

Amity University Jharkhand — **August 2021 – May 2024**
Bachelors of Computer Application — *Ranchi, Jharkhand*

Experience

Jharkhand Space Application Center (GoJ) — **July 2023 – September 2023**
Project Intern – Data Science — *Ranchi, Jharkhand*

- Built and deployed a supervised **machine learning pipeline** to predict **crop yields**, improving forecast accuracy by **20%** using agricultural, climatic, and geospatial datasets.
- Processed and integrated over **2.2 million data points** by developing **scalable ETL pipelines** using **Python (Pandas, NumPy)** and **Scikit-learn**, reducing processing time by **30%**.
- Generated 4+ interactive dashboards using Matplotlib and Seaborn, enabling non-technical stakeholders to interpret trends and insights, and improved model explainability by 25% through feature importance analysis and visual storytelling.

Projects

Driver Monitoring System | *Computer Vision, IoT, Python, OpenCV, Arduino* — **Github Link**

- Designed a real-time **driver fatigue and alcohol detection system** with **90% drowsiness detection accuracy** using **OpenCV** and ML classifiers.
- Integrated **ESP8266, GPS, and MQ-3 sensors** to detect alcohol levels, disable ignition, and send **automated alerts with live GPS location** to authorities.
- Improved road safety by **reducing simulated accident rates by 30%** through **predictive analytics and sensor data fusion**.

AI Career Roadmap Platform | *FastAPI, PostgreSQL, LLMs, JWT, Groq API* — **Github Link**

- Built a full-stack AI-powered career planning platform that generates personalized skill roadmaps and day-wise study plans for any role, improving structured learning efficiency by 70%.
- Integrated LLM-based intelligence (Groq LLaMA) to dynamically generate career roadmaps, daily plans, and topic-level explanations, supporting up to 360-day learning timelines with secure JWT-based authentication.
- Developed a modern, animated Next.js frontend with protected routes, progress tracking, and AI-assisted learning, achieving seamless end-to-end user interaction across authentication, planning, and learning workflows.

Technical Skills

Programming Languages: Python, Java
Data Science & Machine Learning: Machine Learning, Deep Learning, NLP, Data Preprocessing, Feature Engineering
Libraries & Frameworks: Pandas, NumPy, Scikit-learn, TensorFlow, Matplotlib, Seaborn, FastAPI
Data Engineering & MLOps: ETL Pipelines, Apache Airflow, CI/CD Pipelines
AI & LLMs: Large Language Models (LLMs), Prompt Engineering, Groq API (LLaMA), AI-driven Content Generation
DevOps & Cloud: Docker (Basics), AWS (EC2, S3), Linux
Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook
Databases & Core Concepts: PostgreSQL, MySQL, RESTful APIs, JWT Authentication, Object-Oriented Programming (OOP), Data Structures and Algorithms

Leadership / Extracurricular

Institute Innovation Council (IIC) — **2023 – 2024**
Core Member (Top 15 Selected Students) — *Amity University*

- Selected among the top 15 students university-wide to represent the Institute Innovation Council, contributing to innovation, entrepreneurship, and research-driven initiatives.

Microsoft Learn Student Ambassador — **2022 – 2024**
***GOLD** Student Ambassador* — *Amity University*

- Served as a Microsoft Learn Student Ambassador for two years, driving technical community engagement and peer-to-peer learning initiatives.
- Planned and delivered technical sessions and hands-on workshops on emerging technologies, strengthening practical skills and industry readiness among students.
